

# CAMSWITCH™ 4 PLUS

802.3AT POE NETWORK SWITCH

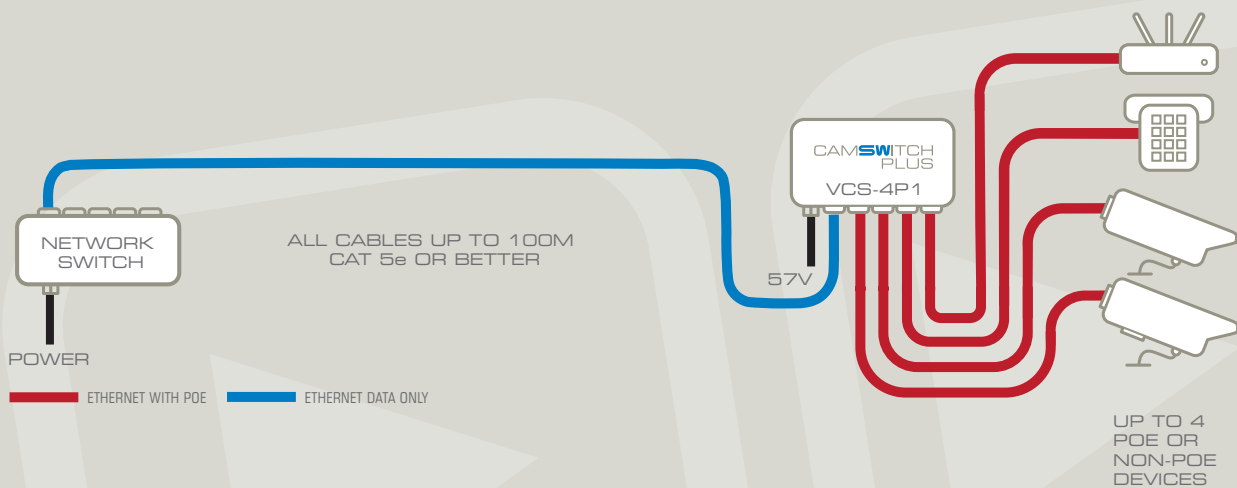

## CAMSWITCH 4 PLUS replaces CAMSWITCH QUAD

CAMSWITCH 4 PLUS is an upgraded replacement for CAMSWITCH QUAD

- 802.3at POE Plus support
- No power class restrictions
- Extra surge protection and reliability
- Now with POE input capability, allowing optional remote powering.
- 12V DC or 24V DC powered applications will be supported by our forthcoming CAMSWITCH MOBILE product range.
- For 24VAC applications, please contact Veracity.
- Higher power budgets, as well as higher port count options will be added to the product range soon

*Note: 57V DC can be used efficiently over legacy power cabling.*
